

Cabletec is an established market leader in the design and manufacture of customised, high performance, multicore cables. We offer machine built cables with heat shrink and extruded jacket options, as well as stainless steel over braid to meet the most demanding environmental conditions.

We pride ourselves on our UK based design and manufacturing facilities offering low MOQs, hand built prototypes and test leads with shorter lead times than typical manufacturers. Providing custom designed builds with different spec wires from 32awg to 6awg in lengths up to 100 meters.

#### Value Add

To support our high quality cable manufacturing, we have IPC/WHMA-A-620 certified operatives onsite which enables us to offer a variety of value added services including; cable terminations, connector assemblies and coiled cable options. Allowing Cabletec to offer our customers best in class full assembly solutions executed to the highest industry standards.

Our dedicated sales team are on hand for technical assistance and can provide full drawings for your custom cables. Contact us to discuss your requirements today.
